“After more than 31 years working in Bosler’s Youth Services department, I think the thing I am most proud of is having been the first library in the county and one of the first in the region to offer infant programming. I have so many fond memories of working here, such as the little girl who took her first steps while coming to see me in my office. Although I find there are other things I would like to explore in the next stage of my life, Bosler will always remain close to my heart. - *Melissa Killinger*
